wherein said composite bubble-pack assembly comprises:

(i) a first bubble pack having a first thermoplastic film having a plurality of portions wherein each of said portions defines a cavity and a second thermoplastic film in sealed engagement with said first film to provide a plurality of closed said cavities;

(ii) a second bubble-pack having a third thermoplastic film having a plurality of portions wherein each of said portions defines a cavity and a fourth thermoplastic film in sealed engagement with said third film to provide a plurality of closed said cavities; and

(iii) a film selected from a thin foil of metal or a metallized thermoplastic film interposed between and bonded to said first bubble-pack and sai`' second bubble-pack.

7. The method of claim 6, wherein said metal or metallized thermoplastic is a laminate layer interposed between a pair of polyethylene films to constitute a laminate interposed between and bonded to said first bubble-pack and said second bubble-pack.

8. The method of claim 6, wherein said metal is aluminum.

9. The method of claim 6, wherein at least one of said first, second, third and fourth films is formed of a thermoplastic selected from the group consisting of a low density polyethylene, a linear low density polyethylene and a nylon.

10. The method of claim 6, wherein said bubble-pack assembly has a thickness selected from 0.4 cm to 1.2 cm.

11. The method of claim 6, wherein said construction materials is selected from the group consisting of sand, gravel, lime and concrete.

12. The method of claim 11, wherein said construction materials is concrete.--

---

REMARKS

Reconsideration and allowance in view of the foregoing amendments and the following remarks are respectfully requested.

Claims 1-5 are presently pending in this application. In the Amendment filed October 31, 2001, claims 1 and 4 were amended. By this Supplemental Amendment, new claims
